	Comments
(L) 25X1	Only paragraphs 1 and 7 indicate that the SS Kaserne, Dresden-Wilder Warn
23/1	was occupied to capacity, as was also reported at t25X1 beginning of July 1951. See a present report confirms
25X1	to a certain extent the motorcycle unit and the signal unit, which are
	carried in the installation. See . On the other hand, the
	present and previous reports make it doubtful that the SS Kaserne should also quarter the Hv Tank SP Regt of the First Gds Hecz Army
	which has been tentatively carried there. Two of the four tank regiments
	of the 11th Gds Tank Div are believed to be quartered in the Koenig Georg
	Kaserne and the Hormann Coering Kaserne respectively. In the course of three years, 30 to 40 manks were seen by sources at least once in each
	of these two installations, but only 7 tanks were once seen in the SS
	Kaserne, wilder Menn, According to the analysis of turret numbers of
	armored vehicles, individual tanks seen in the SS Kaserne belong to the
	11th Gds Tank Div. Thus, it may be possible that the unidentified Hv Tank SP Regt of the First Gds Necz Army does not exist at all, and that
	elements of one of the tank regiments of the 11th 3ds Tank Div or tanks
	of the army undergoing repair are located in the SS Kaserne, Turret number
	319 mentioned in paragraph 1 of the present report was probably mistaken and should read 913 which was observed by another source in the 25X
	installation in July 1951, See
	would indicate that the tank belongs to the 9th Tank Div and
	on the other hand, would be indicative of the 11th 3ds Tank
	Div. The statement in paragraph 1 of the present report to the effect
	that never more than 3 tanks were seen at the same time would rule out
(2)	the presence of an entire tank regiment. According to information in paragraphs 2,4 and 6 by three sources, the
(-)	components of the 11th Gds Tank Div, including the 40th Gds Tank Regt,
	which are carried in the collective billeting area of the Hermann Gering
25X1	Kaserne and the Napola were still at Koenigsbrueck about the middle of August 1952. See, Nost of the vehicle numbers mentioned
25/1	in the present report belong to the 11th Gis Tank Div.
(3)	According to two other sources, a processing center for troops was
25X1	apparently located in the Polizei Kaserne, Helterau, in May and June 1963 See The present report indicates that this center was
25/(1	See . The present report indicates that this center was deactivated in July 1951.
(4)	Paragraph 7 confirm the army signal unit periodically observed in the
	Adolf Hitler Kaserne, The information indicates that the unidentified
	component of the 11th Gds Tank Div from the installation was at Koenigs-brueck at the time of observation, but sizable contingents of recruits
25X1	arrived there. See . It is improbable that the recruits
	mentioned in paragraph 3 of the present report should have belonged to
	the 1932 and 1933 classes, because available documents indicate that the 1932 class was only registered for the draft in January 1951.

(5)	The information indicates that the Hq First Gds Mecz Army was still
	located in the 101st Grenadier Regt Kaserne.
(6)	The Maschinengewehr Kaserne on Alaunplatz is carried as quartering a
	headquarter unit of the First Gds Mecz Army. Its occupation was
	apparently increased from about 100 soldiers in Lay 1951 to about 600
25X1	by the arrival of recruits after
(7)	The 7th Gds Nv Tank SP Regt of the 11th Gds Tank Div believed to be
	stationed in the southern portion of the Koenig Georg Kaserne has been
25X1	at Koeniasbruck since April 1951. See Recruits and
	the personnel of the 100th Repair Shop located in the northern portion
	of the installation are probably the only troops quartered there at
	present.
(8)	Paragraphs 10 and 13 agree with provious information on the Heiter-
	blick Kaserne, Leipzig. See, According to this
25X1	information, most of the components of the 8th Gds Necz Div, which
	went to Koenigsbrucck in 1951, were still there in the middle25X1
	of August 1951. A large training unit, which was called a training
	course for junior officers probably rotates to a25X1
	hitherto unknown troop training grounds between Otterwisch and
	Liebertwolkwitz, southeast of Leipzig, as stated in paragraph 10 of
	the present report. Paragraph 13 indicates that this unit was again at
	its hore station after 1951. 25X1
(9)	Paragraphs 11 and 13 indicate no change with regard to the occupation
	of the Flak Kaserne, Leipzig-Schoenau, since a report of 13 July 1951
	by another source. See 25X1
(:10)	Paragraphs 12 and 13 indicate that the SCC komendantura and Air Force
	were still located in the Hindenburg Kaserne.
(11)	Probably the Ulanen Kaserne bordering on the central hospital to the
	northeast. The existence of a repair shop was previously known.
	Detailed information is not available.
(12)	About 300 to 800 troops were periodically observed in the Train Keserne
• •	on Olbrichtstrasse, which is also believed to quarter a signal-
	communications unit of the GOFG. See 25X1
